

🌟 Daily Challenge – 100 Days of Code (UPES) 🌟

Student Instructions

Day 100 (Today)

Q150 (Enum)

Use pointer to struct to modify and display data using `->` operator.

► Show Sample Test Cases

Day 1

Q1 (User Inputs, Operations & Output)

Write a program to input two numbers and display their sum.

► Show Sample Test Cases

Q2 (User Inputs, Operations & Output)

Write a program to input two numbers and display their sum, difference, product, and quotient.

► Show Sample Test Cases

Division by zero should be handled carefully.

Day 2

Q3 (User Inputs, Operations & Output)

Write a program to calculate the area and perimeter of a rectangle given its length and breadth.

► Show Sample Test Cases

 Q4 (User Inputs, Operations & Output)

Write a program to calculate the area and circumference of a circle given its radius.

► Show Sample Test Cases

Day 3

 Q5 (User Inputs, Operations & Output)

Write a program to convert temperature from Celsius to Fahrenheit.

► Show Sample Test Cases

 Q6 (User Inputs, Operations & Output)

Write a program to swap two numbers using a third variable.

► Show Sample Test Cases

Day 4

Q7 (User Inputs, Operations & Output)

Write a program to swap two numbers without using a third variable.

► Show Sample Test Cases

Q8 (User Inputs, Operations & Output)

Write a program to find and display the sum of the first n natural numbers.

► Show Sample Test Cases

Day 5

Q9 (User Inputs, Operations & Output)

Write a program to calculate simple and compound interest for given principal, rate, and time.

► Show Sample Test Cases

 Q10 (User Inputs, Operations & Output)

Write a program to input time in seconds and convert it to hours:minutes:seconds format.

► Show Sample Test Cases

Day 6

 Q11 (Conditional Statements)

Write a program to input an integer and check whether it is even or odd using if-else.

► Show Sample Test Cases

 Q12 (Conditional Statements)

Write a program to input an integer and check whether it is positive, negative or zero using nested if-else.

► Show Sample Test Cases

Day 7

Q13 (Conditional Statements)

Write a program to input a year and check whether it is a leap year or not using conditional statements.

► Show Sample Test Cases

Year is a leap year if divisible by 4 but not 100, except if divisible by 400.

Q14 (Conditional Statements)

Write a program to input a character and check whether it is a vowel or consonant using if-else.

► Show Sample Test Cases

Day 8

Q15 (Conditional Statements)

Write a program to input a character and check whether it is an uppercase alphabet, lowercase alphabet, digit, or special character.

► Show Sample Test Cases

Q16 (Conditional Statements)

Write a program to input three numbers and find the largest among them using if-else.

► Show Sample Test Cases

Day 9

Q17 (Conditional Statements)

Write a program to find the roots of a quadratic equation and categorize them.

► Show Sample Test Cases

Q18 (Conditional Statements)

Write a program that accepts a percentage (0-100) and assigns a grade based on the following criteria:

90-100: Grade A

80-89: Grade B

70-79: Grade C
60-69: Grade D
below 60: Grade F.

► Show Sample Test Cases

Day 10

Q19 (Conditional Statements)

Write a program to classify a triangle as Equilateral, Isosceles, or Scalene based on its side lengths.

► Show Sample Test Cases

Q20 (Conditional Statements)

Write a program to display the day of the week based on a number (1-7) using switch-case.

► Show Sample Test Cases

Day 11

Q21 (Conditional Statements)

Write a program to display the month name and number of days using switch-case for a given month number.

► Show Sample Test Cases

Q22 (Conditional Statements)

Write a program to find profit or loss percentage given cost price and selling price.

► Show Sample Test Cases

Day 12

Q23 (Conditional Statements)

Write a program to calculate library fine based on late days as follows:

First 5 days late: ₹2/day

Next 5 days late: ₹4/day

Next 20 days late: ₹6/day

More than 30 days: Membership Cancelled.

► Show Sample Test Cases

 Q24 (Conditional Statements)

Write a program to calculate electricity bill based on units consumed with these rates:

First 100 units at ₹5/unit

Next 100 units at ₹7/unit

Next 100 units at ₹10/unit

Above at ₹12/unit

► Show Sample Test Cases

Day 13

 Q25 (Conditional Statements)

Write a program to implement a basic calculator using switch-case for +, -, *, /, %.

► Show Sample Test Cases

 Q26 (Loops without Arrays/Strings)

Write a program to print numbers from 1 to n.

► Show Sample Test Cases
